

Beer de Vreeze Junior AI Engineer

beer@vreeze.com beerdevreeze.com github.com/Beer-de-Vreeze linkedin.com/in/beer-de-vreeze-59040919a

Profile -----

I build AI agents that finish real work.

I work on an AI harness, MCP servers, agent skills and automations, and help companies bring AI into their workflows. I judge an agent by whether it finishes real work, not by the demo. I came to AI through game development.

Experience -----

- Junior AI Engineer** Aug 2026 – present
ASAPCLOUD, Houten
- > Work on an AI harness, MCP servers, agent skills and automations.
- > Help companies bring AI into their workflows.
- Software Development Intern, Data & AI team** Sep 2025 – Mar 2026
ASAPCLOUD, Houten
- > Built tools and systems in TypeScript, including MCP servers.
- Apprentice Chef** Aug 2021 – Jun 2023
Ruby Rose, Winkel van Sinkel, Camping Ganspoort, Utrecht
- Support Technician** Aug 2019 – May 2021
ASAPCLOUD, Houten

Projects -----

- showhow** open source
- Agent skill that turns a codebase into a narrated how-to or what's-new video. It reads the code, docs and git history, writes the script, rebuilds the real UI and renders an MP4 with voice-over and captions. Runs in Claude Code, Codex and OpenCode.
- Python, Hyperframes, agent skills – github.com/Beer-de-Vreeze/showhow
- bunq Voice** bunq Hackathon 7.0, 24 h
- Voice-first banking for people who are blind or partially sighted, built for a multimodal AI challenge. A FastMCP server exposes bunq's API to Claude as tools; payments are only ever drafts that need biometric approval in the bunq app. Team of four; I worked on the MCP server and voice pipeline.
- Python, FastMCP, Claude Sonnet, xAI Grok, TypeScript, React
- Sable** personal product
- Wardrobe app with accounts, a Claude-backed stylist and a remote MCP server with sign-in, so agents can read and update your closet. Syncs across devices and works offline.
- TypeScript, React 19, Hono, Better Auth, Neon Postgres, Claude
- Games and tools** 2023 – 2025
- Unity and C#: stealth game with multi-state enemy AI, a dialogue engine, a drawing roguelike, ML-Agents training, editor tooling.

Details -----

- Location**
Beusichem, Netherlands
- Date of birth**
19 August 2005
- Languages**
Dutch, English
- Website**
beerdevreeze.com

Skills -----

- AI and agents**
MCP servers, agent skills, Claude, tool design, agent workflows
- Languages**
TypeScript, Python, Rust, C#
- Web**
React, Astro, Vite, Node.js, Postgres
- Tools**
Git, Docker, Vercel, Unity

Certifications -----

- Azure AI Fundamentals**
Microsoft Certified
Oct 2025
- Azure Fundamentals**
Microsoft Certified
Sep 2025

Education -----

- Creative Software Development**
Game Development profile, MBO Grafisch Lyceum Utrecht
Sep 2023 – May 2026
- Culinary Arts, MBO**
ROC Midden Nederland, Nieuwegein
Sep 2021 – Jun 2023
- VMBO TL**
Lek en Linge, Culemborg
Sep 2017 – Aug 2021

Outside work -----

Scuba diving, cocktails from scratch, gaming.
